

General Description of the Company

Anhui Forklift Group Corporation Ltd. (hereinafter referred as Heli) is a leading enterprise of industrial trucks in China.

Since 2016, Heli has been ranked among the top seven in the world, representing Chinese brands to forge ahead towards higher stage. (According to the "Top 20 Industrial lift truck suppliers" released by MMH.)

As the leading enterprise in China industrial truck industry, Heli has the ability and strength to participate in the global competition in a higher level, larger scale and wider field. Heli has established overseas centers in France, Thailand and the United States, which enhance the service ability in overseas market. Besides, relying on our global partners, we have established an overseas marketing and service network in more than 80 countries and regions, and Heli products are sold to more than 150 countries and regions in the world. In the next five years, Heli will vigorously promote the international operation and create a global famous brand.

Battery Forklift Truck**

HELI

SMALL BODY,
GREAT ENERGY

GREAT ENERGY

High performance ensures high efficiency

Multiple configuration, Low energy consumption

Steering according to the demand of oil, reduce the energy consumption of the vehicle

High precision angle potentiometer makes steering more sensitive and accurate.

The forklift truck is equipped with high brightness, long life, more energy saving LED lights.

Low rolling resistance electric truck special solid tire reduces driving resistance consumption.

Small dimension, More flexible

European small vehicle width is suitable for narrow aisle passage. Large angle steering axle makes the turning radius smaller satisfying the loading and unloading operation in narrow aisle.

Quick charge, long battery life

- Realizes faster charging; standard 202ah lithium battery has ultra long endurance;
- The characteristics of high-density energy and quick charging of lithium battery make all day uninterrupted operation of a forklift truck.

Enjoy driving experience

- P — Powerful
 - E — Economical
 - S — Energy Saving
- Multiple performance modes could meet the needs of various working conditions.

Center rearview mirror

New pedal parking system, ergonomic design, very convenient

USB power supply

Storage box

The mast with large opening offers good driving vision ensuring operation comfort and safety.

Large space to get on, and large leg space, more comfortable operation

Intelligent security protection

Intelligent stabilization system: it can automatically adjust the tilt angle (Solenoid valve configuration) and speed of the mast according to the lifting height and load state. Improve the high bearing capacity and vehicle stacking safety.

Intelligent speed limit in different application: multi-scenario identification and intelligent speed limit balance efficiency and safety.

Intelligent limit buffering: intelligent induction of mast lifting and lowering avoids extreme impact and is safe and comfortable.

Intelligent operation protection: a full set of OPS system can avoid misoperation and ensure safety.

Intelligent control strategy: dual core controller is in line with the latest EU safety requirements.

Intelligent steering deceleration: the automatic deceleration function of the turning can reduce the risk of turning over.

Lithium battery which heats itself automatically at low temperatures has excellent low temperature adaptability.

Reliable Quality, Easy Maintenance

The whole vehicle works alternately in the -20°C cold storage and is parked in the cold storage for 12 hours. The whole vehicle is trouble-free and can run sustainably. The reinforced casting steering axle is mature and reliable. The force optimization design of mast improves the overall performance and ensure the safety of operation effectively.

Operating Cost Comparison:

Lithium battery forklift vs. Lead-acid battery forklift vs. IC forklift

The advantages of HELI lithium battery forklift trucks are more prominent in the life cycle cost.

Compared with internal combustion forklift truck, lithium battery forklift truck has the advantages of no noise, no pollution, small vibration and simple operation.

Compared with the lead-acid battery forklift truck, lithium battery forklift has the characteristics of fast charging and charging at any time, which is more suitable for multi shift operation.

Besides, HELI Lithium-ion Battery Forklift is maintenance-free, with high energy conversion, saving a lot of operating costs.

Manufacturer and Technical Data						
Characteristics						
1.01	Manufacturer			HELI		
1.02	Model			CPD15	CPD16	CPD18
1.03	Configuration number			GE2DLI	GE2DLI	GE2DLI
1.04	Rated capacity	Q	kg	1500	1600	1800
1.05	Load center distance	c	mm		500	
1.06	Power mode				Battery	
1.07	Driving mode				Sealed	
1.08	Load distance, center of drive axle to fork	x	mm	367	367	367
1.09	Wheelbase	y	mm	1292	1292	1400
Weight						
2.01	Total weight (with/without battery)		kg	2915/2635	3015/2735	3180/2900
2.02	Axle load (laden, front/rear)		kg	3895/520	4045/570	4390/590
2.03	Axle load (unladen, front/rear)		kg	1365/1550	1385/1630	1430/1750
Tyres

8.02	Operating pressure for attachments		Mpa	17.5	17.5	17.5

Note: Configuration 2: ZAP1; 3: JNMOTION; 6: HELI Technology

CPD15 CPD16 CPD18 CPD20

Note: The vertical axis stands for load capacity while the horizontal axis stands for load center which is calculated from the front surface of the forks to the gravity of the standard load. The standard load means a cubic with 1000mm edge length. When the mast is tilted forward, the worker using nonstandard forks for loading large goods, the load capacity will be reduced. The load capacity of standard mast at different load center can be known from this load chart.

Optional

Security class	Steering automatic deceleration	●
	Reversing handle with horn button	●
	OPS system (Excluding descent)	●
	Complete OPS system	○
	Seat belt switch	○
	Multi way valve overload	●
	Fire extinguisher	○
	Backward buzzer	●
	Reversing Chinese language horn	○
	Electronic upper buffer	●
Comfort class	Rearview mirror with angle in the middle	●
	Left and right rear mirror	○
	Tilt speed limit	●
	Active stabilization	●
	Descent configuration for full free 3-stage mast above 4m	○
	Standard seat	●
	Fully suspended seat	○
	USB power	●
	Mechanical valve	●
	Solenoid valve (proportional valve + thumb switch)	○
Non standard overhead guard	Fan	○
	Color screen instrument	●
	Heater	○
	Performance mode control	●
	Steering wheel with operation ball	●
	Steering wheel without operation ball	○
	The height of overhead guard is increased by 50mm	○
	Overhead guard with protective net	○
	Cab	○
	Fit the front windshield	○
Cab/windshield glass	Equipped with rear windshield	○
	Equipped with top rain glass	○
	No rear work lights or rear blue lights	●
	LED rear work light	○
	LED rear blue light (without switch control)	○
	LED rear work light and LED rear blue light (without switch control)	○
	LED flickering warning light	●
	LED rotary warning light	○
	LED rotary buzzer warning light	○
	HEDING lithium battery	●
Light class	ENEROC lithium battery	○
	EIKTO lithium battery	○
	Solid tire	●
	Traceless tyre	○
	Single tire (front wheel)	●
	Double tire (front wheel)	○
	Metric thread	●
	American thread	○
	Sleeve for Tilting cylinder	○
	Tilting cylinder, sleeve for steering cylinder	○
Other	HELI package	●
	Neutral package	○
	Chinese sticker	●
	English sticker	○
	Custom-made sticker	○
	HELI smart fleet management system (standard version)	○
